

## Chemistry Department

### COLLEGE OF SCIENCE AND MATHEMATICS

#### Student Outcomes Assessment Plan (Soap)

HOLD CTRL THEN CLICK TO VIEW EXAMPLE

#### I. Mission Statement

The mission of the Department of Chemistry is to provide students with the appropriate level of modern and comprehensive chemical education required for life and work in our technologically advanced society. To accomplish this the department offers courses for students planning to be professional chemists, for students planning careers in the medical professions and careers in teaching, for students requiring a basic chemical science background for other majors, and for students fulfilling their general education science requirements.

#### II. Goals and Student Learning Outcomes

HOLD CTRL THEN CLICK TO VIEW EXAMPLE

**A. Students will demonstrate competency in searching and reading chemical literature**

Students will complete a literature search related to one or more areas in chemistry by using common literature search techniques to find recent peer-reviewed journal articles on the topic, critically read these papers to extract useful information, and summarize the significance of these articles to their topic in written or oral form.

**B. Students will demonstrate competency in speaking and presentation skills**

Students will prepare and deliver presentations on recent chemical research from both their work and the literature in seminars open to faculty and students. Students will effectively communicate with the audience at an appropriate level, use visual aids (e.g., Power point slides) that are clear, professional-looking, and which support and supplement the oral presentation, and answer questions from the audience in a manner that demonstrates a thorough knowledge of the material presented.

**C. Students will demonstrate competency in organizing complex information**

Students will present data, information and ideas in a logical sequence to present a sound scholarly argument in both oral presentations and written papers.

**D. Students will demonstrate competency in interpreting and critically evaluating experimental results**

Students will present current state of knowledge of a topic including balanced descriptions of various and possibly conflicting opinions. The gaps in current knowledge are clearly identified and significant directions and approaches that fill these gaps are identified. The relationship to the students' own research is clearly explained (when appropriate).

**E. Students will demonstrate competency in scientific writing skills**

Students will write papers that meet the style and format of an appropriate peer-reviewed journal. The paper follows conventions for spelling and grammar and is essentially error free in terms of mechanics. Writing flows smoothly from one idea to another. Transitions effectively establish a sound scholarly argument and aid the reader in following the writer's logic.

**F. Students will demonstrate competency in collecting scientific data**

Students will design experiments and collect data in an appropriate way to answer key research questions. Data are collected with appropriate accuracy and precision, and possible errors/limitations are recognized.

### III. Curriculum Map (Matrix of Courses X Learning Outcomes)

HOLD CTRL THEN CLICK TO VIEW EXAMPLE

Course	Objectives					
	A	B	C	D	E	F
CHEM 201		I				
CHEM 215-251	I	I	I,R		I	I
CHEM 260	R	R	R	I, R	R	I
CHEM 280	R	R, A	R			
CHEM 290	R, A		R, A	R, A	R, A	R
CHEM 295	A		A	A		A
CHEM 299	A		A	A	A	A

I = Introduced; R = Reinforced; A = Advanced

### IV. Assessment Methods

#### A. Direct Measures (at least three)

1. Literature seminar (CHEM 280) evaluation by faculty using presentation rubric (Appendix A).
2. Thesis defense seminar evaluation by faculty using presentation rubric (Appendix B).
3. Graduate writing requirement (GWR) paper evaluation by faculty using writing rubric (Appendix C).
4. Thesis evaluation by faculty using writing rubric (Appendix C).

#### B. Indirect Measures (*Alumni Survey is required*)

1. Graduate student survey (Appendix D).
2. Alumni survey (Appendix E).

These assessment methods will be applied to measure student learning outcomes as specified below.

#### Student Learning Outcome A.

Direct Measure 1: Section 1D. "Literature Review & Citation".

Indirect Measures 1 and 2: Items 4 "Searching of Chemical Literature" and 5 "Reading of Chemical Literature".

#### Student Learning Outcome B.

Direct Measures 1 and 2: Sections 2A. "Speaking Ability", 2B. "Visual Aids", and 2C "Question and Answer Session".

Indirect Measures 1 and 2: Items 7 “Presenting (orally) of Chemistry Papers and Reports”, 8 “Communicating with faculties and fellow students” and 9” Working in team projects”.

**Student Learning Outcome C.**

Direct Measures 1 -4: Measures 1 and 2 Section 1.C. “Organization of Material”; Measures 3 and 4 Section III “Section III. Content and Organization”.

**Student Learning Outcome D.**

Direct Measures 3 and 4: Section IV “Integration and Critical Analysis”.  
Indirect Measures 1 and 2: Item 1 “Understanding Chemical Information”.

**Student Learning Outcome E.**

Direct Measures 3 and 4: Sections I. “Style and Format”, and II. “Mechanics”.  
Indirect Measures 1 and 2: Item 6 “Writing of Chemistry Papers and Reports”.

**Student Learning Outcome F.**

Direct Measure 2: Section 1.D. “Scientific Data Collection”.  
Indirect Measures 1 and 2: Item 3 “Conducting Chemical Research and Experiments”.

A mean score for all students of 2.0 (out of 3) demonstrates achievement of the learning outcome for direct measures A.1. and A.2. A mean score for all students of 3.5 (out of 5) demonstrates achievement of the learning outcome for direct measures A.3. and A.4 and indirect measures B.1. and B.2.

**V. Student Learning Outcomes X Assessment Methods Matrix**

[HOLD CTRL THEN CLICK TO VIEW EXAMPLE](#)

Assessment Measure	Objectives					
	A	B	C	D	E	F
A1	x	x	x			
A2		x	x			x
A3			x	x	x	
A4			x	x	x	
B1	x	x		x	x	x
B2	x	x		x	x	x

**VI. Timeline for Implementation of Assessment Methods and Summary Evaluations**

[HOLD CTRL THEN CLICK TO VIEW EXAMPLE](#)

**Year 2013 to 2014**

Measure A1, A2, A3, A4 and B2  
Assess SLO B.

**Year 2014 to 2015**

Measure A1, A2, A3, A4 and B1  
Assess SLO D and SLO E.

**Year 2015 to 2016**

Measure A1, A2, A3, A4 and B1  
Assess SLO A and SLO C.

**Year 2016 to 2017**

Measure A1, A2, A3, A4 and B1  
Assess SLO F.

## VII. Closing the Loop - Summary Evaluation, Curriculum Adjustment, and Reporting

[CTRL + CLICK TO  
VIEW EXAMPLE](#)

Our assessment data will be collected according to the timeline above. The data will be incorporated into an annual program review that will be presented to and discussed with the M.S. Chemistry program's external advisory board each Spring semester. Assessment outcomes and advisory board feedback is discussed with the department's graduate committee, which proposes curricular and/or program changes as appropriate. These will then be discussed and voted on in department faculty meetings, and are implemented by the graduate faculty if approved.

Appendix A: Direct Assessment Measure A.1.

CHEM 280 Seminar- **Literature** - Faculty Evaluation of Student Presentation

Student's Name: \_\_\_\_\_ Faculty's Name: \_\_\_\_\_ Date \_\_\_\_\_

1. Content

1A. Background

*Excellent (3 pt.):* The presenter clearly explains the broader context of the topic and its relationship to the presentation. It lays the foundation for the audience to understand the significance and purpose of what follows.

*Very Good (2 pt.):* The broader context of the presentation topic is explained.

*Satisfactory (1 pt.):* The presenter provides some background to the presentation, but connections to the topic are not clearly made.

*Unsatisfactory (0 pt.):* The context of the presentation is not explained.

**Student Score:** \_\_\_\_\_

Written Comments by Evaluating Faculty: \_\_\_\_\_

1B. Statement of Purpose

*Excellent (3 pt.):* The purpose of presentation is clear. Supporting ideas maintain exceptional focus on the topic.

*Very Good (2 pt.):* Topic of the presentation is clear. Content consistently supports the purpose.

*Satisfactory (1 pt.):* Presentation lacks clear direction.

*Unsatisfactory (0 pt.):* No clear focus.

**Student Score:** \_\_\_\_\_

Written Comments by Evaluating Faculty: \_\_\_\_\_

1C. Organization of Material

*Excellent (3 pt.):* Information/ideas are presented in a consistently logical sequence. Transition/connections are eloquent. A strong sense of wholeness is conveyed. The presentation ends with accurate conclusions showing thoughtful, strong evaluation of the evidence presented.

*Very Good (2 pt.):* Important ideas and information are identified for the audience. Information/ideas are presented in a logical sequence with few lapses. Transitions and connections are made. Closing effectively summarizes the presentation.

*Satisfactory (1 pt.):* Irrelevant, unnecessary information detracts. Big ideas are not specifically identified. There are significant lapses in the order of ideas. Transitions are inconsistent and weak or missing. Closing demonstrates an attempt to summarize.

*Unsatisfactory (0 pt.):* No clear organization. Ideas do not connect with one another. There are no clear transitions. No closing is evident.

**Student Score:** \_\_\_\_\_

Written Comments by Evaluating Faculty: \_\_\_\_\_

## 1D. Literature Review & Citation

*Excellent (3 pt.):* Literature review is from appropriate scientific journals, covers the topic in depth, and demonstrates the ability to extract the salient features of the articles.

*Very Good (2 pt.):* Literature review is from appropriate scientific journals but gives a shallow survey of the literature.

*Satisfactory (1 pt.):* Literature review is from appropriate scientific journals but very few articles are presented.

*Unsatisfactory (0 pt.):* No scientific journals have been surveyed, only an internet search of popular magazines and sites (e.g. Wikipedia)!

**Student Score:** \_\_\_\_\_

Written Comments by Evaluating Faculty: \_\_\_\_\_

## 2. Presentation

### 2A. Speaking Ability

*Excellent (3 pt.):* Poised, clear articulation; proper volume; steady rate; enthusiasm; confidence; speaker is clearly comfortable in front of the group. Correct, precise pronunciation of terms. Selects rich and varied words for context and uses correct grammar. Maintains eye contact. Seldom returning to notes. Presentation is like a planned conversation.

*Very Good (2 pt.):* Clear articulation but not as polished; slightly uncomfortable at times. Student pronounces most words correctly. Selects words appropriate for context and uses correct grammar. Student maintains eye contact most of the time but frequently returns to notes.

*Satisfactory (1 pt.):* Audience occasionally has trouble hearing the presentation. Seems uncomfortable. Student incorrectly pronounces terms. Some eye contact, but not maintained and at least half the time reads from notes or visual aids.

*Unsatisfactory (0 pt.):* Presenter is obviously anxious and cannot be heard or monotone with little or no expression. Student mumbles, pronounces terms incorrectly. Selects words inappropriate for context. Uses incorrect grammar. Student reads all or most of report with no eye contact.

**Student Score:** \_\_\_\_\_

Written Comments by Evaluating Faculty: \_\_\_\_\_

### 2B. Communication Aids

*Excellent (3 pt.):* Visual aids are readable, attractive and appropriate for the venue. Graphics are clear and professional looking, enhancing the message. Citations are clearly given for the material taken out of scientific literature.

*Very Good (2 pt.):* Visual aid readable. Graphic is neat. Appropriate graphics are chosen to convey the message.

*Satisfactory (1 pt.):* Visual aid is not completely accessible to all audience members. Graphic may be messy. Visual may not be most appropriate to support presentation.

*Unsatisfactory (0 pt.):* Visual aid undecipherable. Graphic detracts from message. Messy or inappropriate visuals.

**Student Score:** \_\_\_\_\_

Written Comments by Evaluating Faculty: \_\_\_\_\_

**2C. Questions & Answers**

*Excellent (3 pt.):* Speaker understands the specific question asked and responds to it concisely. Expands upon previous statements. Cites additional examples to answer a question. Conveys a thorough knowledge of subject.

*Very Good (2 pt.):* Thoughtful, concise response. Conveys reasonable knowledge of subject.

*Satisfactory (1 pt.):* Response not clear or did not add to comprehension of the listener.

*Unsatisfactory (0 pt.):* Could not answer questions or answers are irrelevant.

**Student Score:** \_\_\_\_\_

## Appendix C: Direct Assessment Measure A.3. and A.4.

### Graduate Writing Requirement and Thesis Rubric

Research proposals submitted for fulfillment or partial fulfillment of the graduate writing requirement are evaluated using the following scoring rubric. Students are scored on a basis of 1 (beginning) to 5 (exemplary) in four areas: style and format, mechanics, content and organization, and integration and critical analysis. A score of 12 or higher on the rubric with a score of 2 or greater for each section is considered passing.

	Beginning	Developing	Satisfactory	Accomplished	Exemplary
Style and Format	1	2	3	4	5
Mechanics	1	2	3	4	5
Content and Organization	1	2	3	4	5
Integration and Critical Analysis	1	2	3	4	5
Total Score	/ 20				

#### ***I. Style and Format:***

**5-Exemplary:** In addition to meeting the requirement for a "4," the paper consistently models the language and conventions used in the scholarly/ professional literature appropriate to the student's discipline. The manuscript would meet the guidelines for submission for publication in a peer reviewed American Chemical Society (ACS) journal in the student's field of study.

**4-Accomplished:** While there may be minor errors, conventions for style and format are used consistently throughout the paper. Demonstrates thoroughness and competence in documenting sources; the reader would have little difficulty referring back to cited sources. Style and format contribute to the comprehensibility of the paper. Suitably models the discipline's overall journalistic style.

**3-Satisfactory:** The style and format are broadly followed, but inconsistencies are apparent. There is selection of less suitable scientific sources (non-peer reviewed literature, web information). Weak transitions and apparent logic gaps occur between topics being addressed. The style may be difficult to follow so as to detract from the comprehensibility of the manuscript.

**2-Developing:** While some ACS conventions are followed, others are not. Paper lacks consistency of style and/or format. It may be unclear which references are direct quotes and which are paraphrased. Based on the information provided, the reader would have some difficulty referring back to cited sources. Significant revisions would contribute to the comprehensibility of the paper.

**1-Beginning:** The stylistic conventions of scientific writing are not followed. Fails to demonstrate thoroughness and competence in documentation. Inappropriate style and format make reading and comprehensibility problematic.

#### ***II. Mechanics:***

**5-Exemplary:** In addition to meeting the requirements for a "4," the paper is essentially error free in terms of mechanics. Writing flows smoothly from one idea to another. Transitions effectively establish a sound scholarly argument and aid the reader in following the writer's logic.

**4-Accomplished:** While there may be minor errors, the paper follows normal conventions of spelling and grammar throughout. Errors do not significantly interfere with topic comprehensibility. Transitions

and organizational structures such as subheadings are effectively used which help the reader move from one point to another.

**3-Satisfactory:** Grammatical conventions are generally used, but inconsistency and/or errors in their use result in weak, but still apparent, connections between topics in the formulation of the argument. There is poor or improper use of headings and related features to keep the reader on track within the topic. Effective scientific vocabulary is used.

**2-Developing:** Frequent errors in spelling, grammar (such as subject/verb agreements and tense), sentence structure and/or other writing conventions make reading difficult and interfere with comprehensibility. There is some confusion in the proper use of scientific terms. Writing does not flow smoothly from point to point; appropriate transitions are lacking.

**1-Beginning:** Paper contains numerous errors in spelling, grammar, and/or sentence structure, which make following the logic of the paper extremely difficult. Scientific terms are misused.

### ***III. Content and Organization:***

**5-Exemplary:** In addition to meeting the requirements for a "4," excels in the organization and representation of ideas related to the topic. Raises important issues or ideas, which may not have been represented in the literature cited. Would serve as a good basis for further research on the topic.

**4-Accomplished:** Follows all requirements for the paper. Topic is carefully focused. Clearly outlines the major points related to the topic; ideas are logically arranged to present a sound scholarly argument. Paper is interesting and holds the reader's attention. Does a credible job summarizing related literature. General ideas are expanded upon in a logical manner thereby extending the significance of the work presented beyond a re-statement of known ideas.

**3-Satisfactory:** Ideas presented closely follow conventional concepts with little expansion and development of new directions. Certain logical connections or inclusion of specific topics related to the student's area of study may be omitted. Ideas and concepts are generally satisfactorily presented although lapses in logic and organization are apparent. The reader is suitably introduced to the topic being presented such that the relationship to the student's area of study is obvious.

**2-Developing:** The paper is logically and thematically coherent, but is lacking in substantial ways. The content may be poorly focused or the scholarly argument weak or poorly conceived. Major ideas related to the content may be ignored or inadequately explored. Overall, the content and organization needs significant revision to represent a critical analysis of the topic.

**1-Beginning:** Analysis of existing scholarly / professional literature on the topic is inadequate. Content is poorly focused and lacks organization. The reader is left with little information about or little understanding of the paper's topic.

### ***IV. Integration and Critical Analysis***

**5 - Exemplary:** The document presents the current state of knowledge for the topic being addressed utilizing a diversity of scientific opinions. These various, and possibly conflicting, opinions are presented in a balanced manner and seamlessly woven together to illustrate a complete grasp of the scientific literature across multiple research approaches utilizing appropriate national and international peer-reviewed journals. Essential findings of multiple sources are accurately and concisely paraphrased, analyzed, and integrated. Original sources are clearly identified and correctly cited in both the body of the text and the reference section. Organizationally, smooth and effective transitions between topics lead the reader through an orderly discussion of the topic being addressed. The gaps in current knowledge are clearly identified and significant directions and approaches that fill these gaps are identified.

**4 - Accomplished:** There are inconsistencies in the organization and logic of the presentation, but still clear analysis of the presented materials. While synthesis of all aspects of the topic may show

varying degrees of development, the overall consistency, thoroughness, and analysis result in a well-crafted document.

- 3 - Satisfactory:** Identification of key topics or uncertainties in the field may be incomplete. New concepts resulting from a synthetic presentation of ideas is poorly developed or lacking. Complex topics and related concepts are awkwardly presented and linkages among topics may be unclear.
- 2 - Developing:** Weakness is evident in the coverage of the field and analysis resulting in incorrect or poorly developed synthesis of results. Analysis is limited to categorizing and summarizing scientific topics. The resulting manuscript significantly degrades the comprehensibility of the document and the identification of knowledge gaps.
- 1 - Beginning:** The manuscript contains numerous flaws in the essential components of a literature review. The manuscript lacks a successful synthesis of disparate works, and there is no logical flow to the presentation. These issues result in a manuscript with limited comprehensibility and utility in illustrating the author's effective grasp of the material."
