

Updates (Campus Solutions Only)

One of the biggest updates as we move to People Tools 8.59 is that the login page is all fluid. The breadcrumbs and Main Menu at the top of the screen has been moved to the NavBar screen.

All navigation will now be using the NavBar functionality.

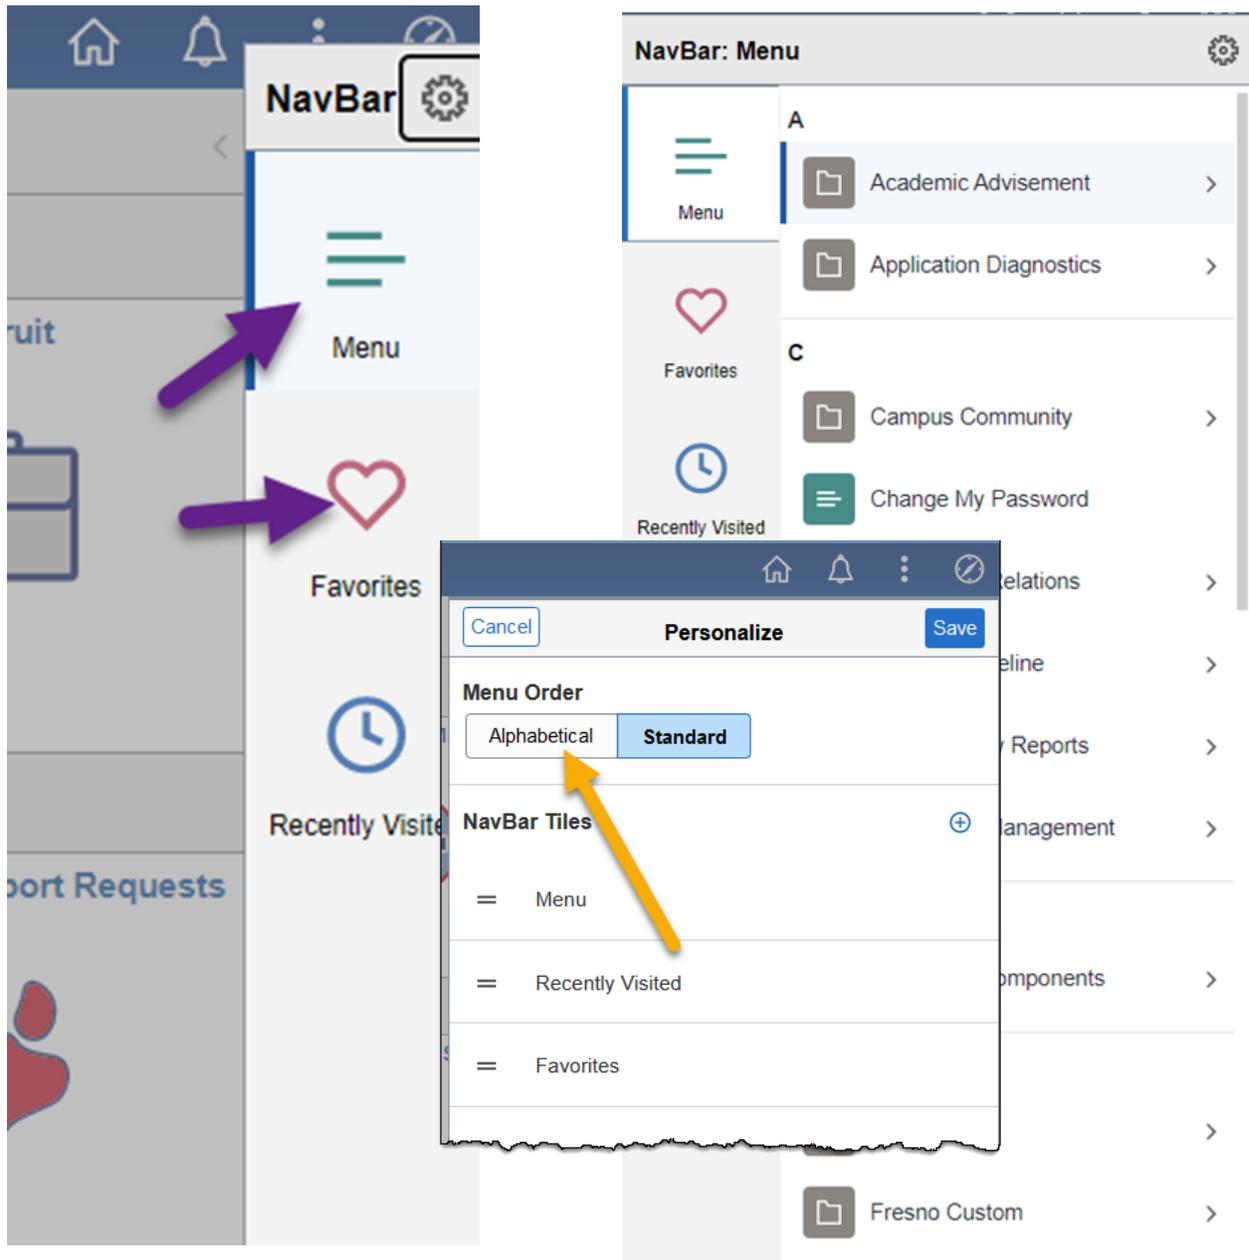

NavBar

The NavBar will be your starting point to navigate to pages in PeopleSoft.

Main Menu is now Menu

Just like the classic view, you will have the Menu, Favorites, and Recently Visited pages available in the NavBar, and (optionally) everything in the Menu can be in alphabetical order.

People Tools 8.59 Tips

Breadcrumbs DOES appear in NavBar screen

Even though we lose the breadcrumbs feature at the top of the page, we do get it in the NavBar.

***Please note that if you have any documentation that has the old breadcrumbs screenshots, they should be updated.**
